LEARNING NEIGHBOURHOOD 3

DIGI TECH - MR LIAM

Students are learning about how all information on computers is stored using just zeros and ones. Computers use the binary number system for this and students are learning to write numbers and letters in binary e.g. 7 is written as 0111.

Students will learn more about using block based programming to create programs, control robots and solve problems

PE - MR EMMANUEL

Students are working through a series of challenges that involve the class cooperating together. These challenges focus on working as a team and having fun being active. This builds their leadership skills while also developing the qualities needed to effectively work as part of a successful team.

ART - MISS MARINA

The focus this term is 'drawing'. Students are learning different shading techniques. They will also be learning about one-point perspective and create art using this technique. Students will explore the artwork of Vincent Van Gogh and Australian artist Reg Mombassa, and they will use these artists as an inspiration when creating their own piece.

Students in LN3 participated in the 'Collective Mural' that is displayed outside the art room.

PERFORMING ARTS - MISS YULIA

Students are building their knowledge about the theatre world this term. They are discovering the history of mime and when it was created by people in ancient history as well as Charlie Chaplin, the famous actor. Students are also learning about the use of props in theatre and the four types of props.

The students will invent their own character and story by creating their own script and props to present on the stage to entertain the audience.
